

ECA Booklet Term 2

2019-20

Introduction to ECAs at JC

Dear Students and Parents

Welcome back to the second term at Jumeirah College .

Once again the enriched activity programme has expanded, with staff bringing their own skills and talents to an already wide and varied list of activities.

Each club is accompanied with a brief description detailing the activity along with the time, venue and the teacher/coach in charge. In the event of your chosen club not displaying a specific day or time, please go to see the person running the club. It may not have been possible to confirm this by the time of going to print.

Please note: Some clubs have specific requirements such as age, cost, equipment etc. but this should be mentioned in the ECA's overview.

Students should see which activities are available from the booklet and speak with the member of staff running the activity. ALL students should also ensure that their ECA options are recorded with their tutors during Form Time. Students are required to turn up to the first session of the ECA and sign up with the coordinating teacher directly. If there are limited places available for a specific ECA, speak to the teacher leading the activity.

As you will see from the wide and varied list of choices, the enriched programme is a great opportunity for students to learn new skills, build on existing ones and interact with students and staff in a different environment. We expect that all students will participate in at least 2 clubs or activities each term and take full advantage of some of the great opportunities available here at Jumeirah College.

For safety reasons we request that students stay in the Library till 16:30PM or are collected outside the school once their ECA has ended. Students are not allowed on campus if unsupervised after 15:00PM.

Remember the first point of contact will be the teacher in charge of the club.

All ECA's start the first week back in term two, unless advised otherwise.

Kind regards,

Mrs C Misra
Assistant Principal
Student Experience

Pilates

Mat Pilates is a way to stretch and strengthen your body, primarily the muscles of the core, which span from your hips to your shoulders. Joseph Pilates developed this exercise methodology in the early 1900s, and it borrows from disciplines such as dance, yoga and classic calisthenics. The standard Pilates system uses many different pieces of equipment, such as the reformer. But the mat Pilates series of exercises is performed equipment-free, with the moves adapted to work with just your body and a floor mat for cushioning and support. Beginners level, but all fitness levels are welcome.
